APPENDIX:

The Appendix includes the following item(s):

- ☒ - a new or amended Abstract of the Disclosure

REPLACEMENT SHEET

Abstract of the Disclosure

The method collects digital images of the body surface of the tested subject after having divided the latter into one or more areas exactly located by spatial coordinates in a system of coordinated axes fixed with respect to predetermined unchanged reference points of the subject. The images are stored in a suitable data base to be then compared automatically with corresponding images collected at distance of time, thus producing a signal of any variation in the number and/or the morphology/color of the lesions.
